Executive Summary

Our e-commerce platform has achieved significant growth, with 120,378 total orders, 116,649 units sold, and \$78,592,678 in total revenue. The average order value is \$609.36, with 48 active states and 7,297 active cities. We offer 9 product categories and 7,195 unique products. However, our analysis highlights areas of concern, including a high dependence on a single product category (Set) and a significant disparity in state-wise revenue performance.

Revenue Insights

Our total revenue is \$78,592,678, with an average order value of \$609.36. The monthly revenue is \$78,592,678, indicating a consistent sales performance throughout the year. However, we have identified a risk of revenue concentration, with the top 5 product categories (Set, Kurta, Western Dress, Top, and Ethnic Dress) accounting for 99.74% of total revenue.

Product Performance

The top 5 product categories are:

1. Set (49.88% revenue share)
2. Kurta (27.10% revenue share)
3. Western Dress (14.27% revenue share)
4. Top (6.80% revenue share)
5. Ethnic Dress (1.01% revenue share)

The top 10 products by revenue are dominated by the J0230-SKD and JNE3797-KR product lines, indicating a high demand for these specific products. However, this also highlights a risk of over-reliance on a limited number of products.

Geographic Analysis

Our state-wise revenue performance is diverse, with the top 5 states being:

1. Maharashtra (16.97% revenue share)
2. Karnataka (13.34% revenue share)
3. Telangana (8.80% revenue share)
4. Uttar Pradesh (8.67% revenue share)
5. Tamil Nadu (8.29% revenue share)

However, we have identified a significant disparity in revenue performance across states, with the top 5 states accounting for 55.07% of total revenue. This highlights an opportunity to expand our customer base and increase revenue in underperforming states.

****Customer Segment Analysis****

Our customer segments are dominated by B2C (Consumer) sales, which account for 99.25% of total revenue. B2B (Business) sales account for only 0.75% of total revenue, indicating a potential opportunity to expand our B2B customer base and increase revenue.

****Operational Risks****

We have identified several operational risks, including:

1. Revenue concentration: Our dependence on a single product category (Set) and a limited number of products (J0230-SKD and JNE3797-KR) poses a risk to our revenue stability.
2. Geographic disparity: The significant disparity in state-wise revenue performance poses a risk to our ability to expand our customer base and increase revenue in underperforming states.
3. Over-reliance on B2C sales: Our dependence on B2C sales poses a risk to our revenue stability, as changes in consumer behavior or market trends could significantly impact our revenue.

****Strategic Recommendations****

To address the identified risks and opportunities, we recommend the following strategic actions:

1. ****Diversify product offerings****: Expand our product categories and introduce new products to reduce our dependence on a single category and a limited number of products.
2. ****Geographic expansion****: Develop targeted marketing campaigns to expand our customer base and increase revenue in underperforming states.
3. ****B2B sales expansion****: Develop a targeted B2B sales strategy to increase revenue from business customers and reduce our dependence on B2C sales.
4. ****Revenue optimization****: Implement revenue optimization strategies, such as dynamic pricing and inventory management, to maximize revenue and minimize losses.
5. ****Customer segmentation****: Develop targeted marketing campaigns to expand our customer base and increase revenue from underperforming customer segments.

Revenue Trend Analysis

The chart below illustrates month-over-month revenue performance. Review peaks and troughs alongside seasonal campaigns or supply events.

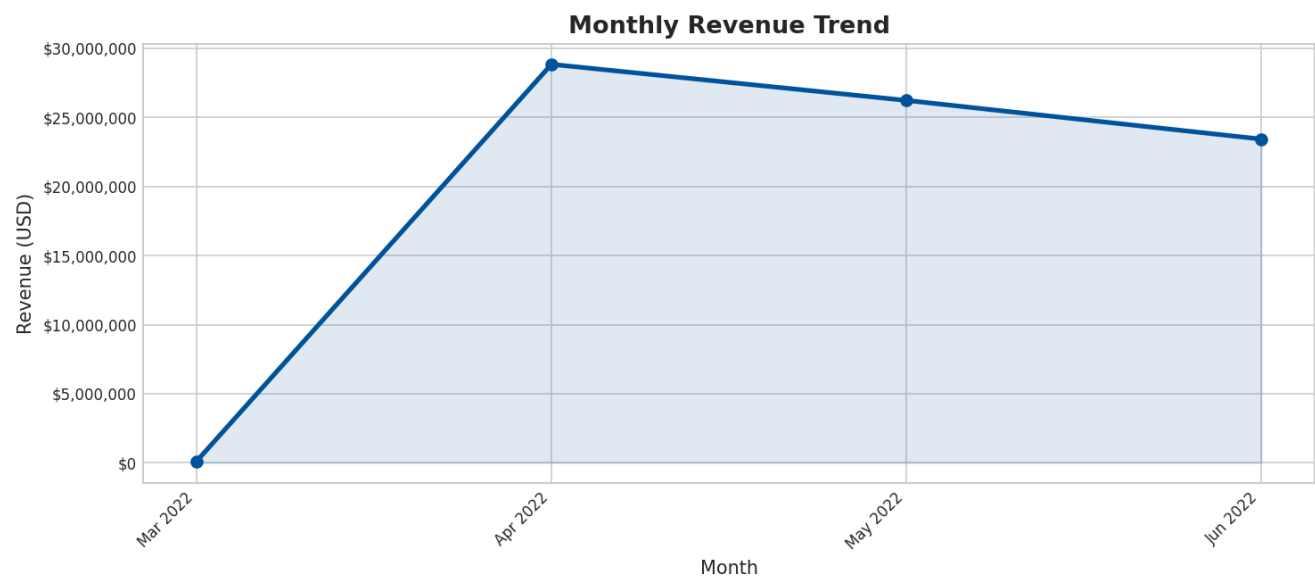

Figure 1 - Monthly Revenue Trend (USD)

Product Category Performance

Revenue contribution ranked by product category. Categories are sorted ascending to highlight highest-value lines.

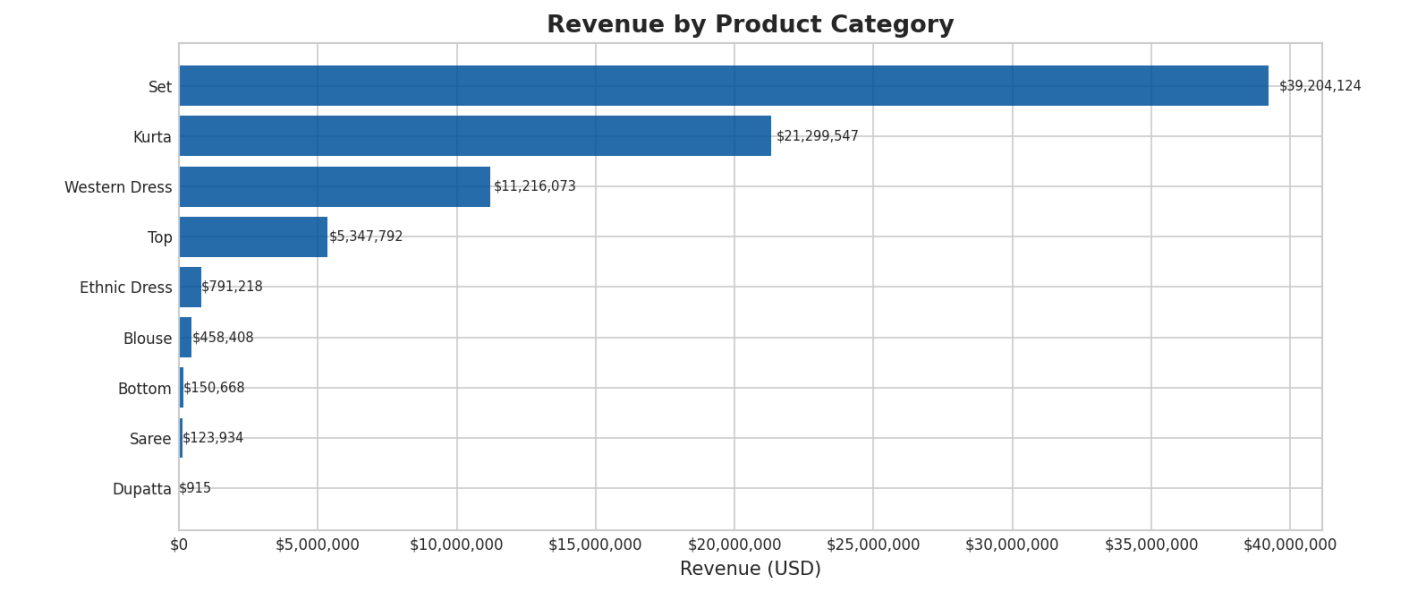

Figure 2 - Revenue by Product Category (USD)

Geographic Revenue Distribution

Top 10 states by total revenue. High geographic concentration may represent both strength and risk.

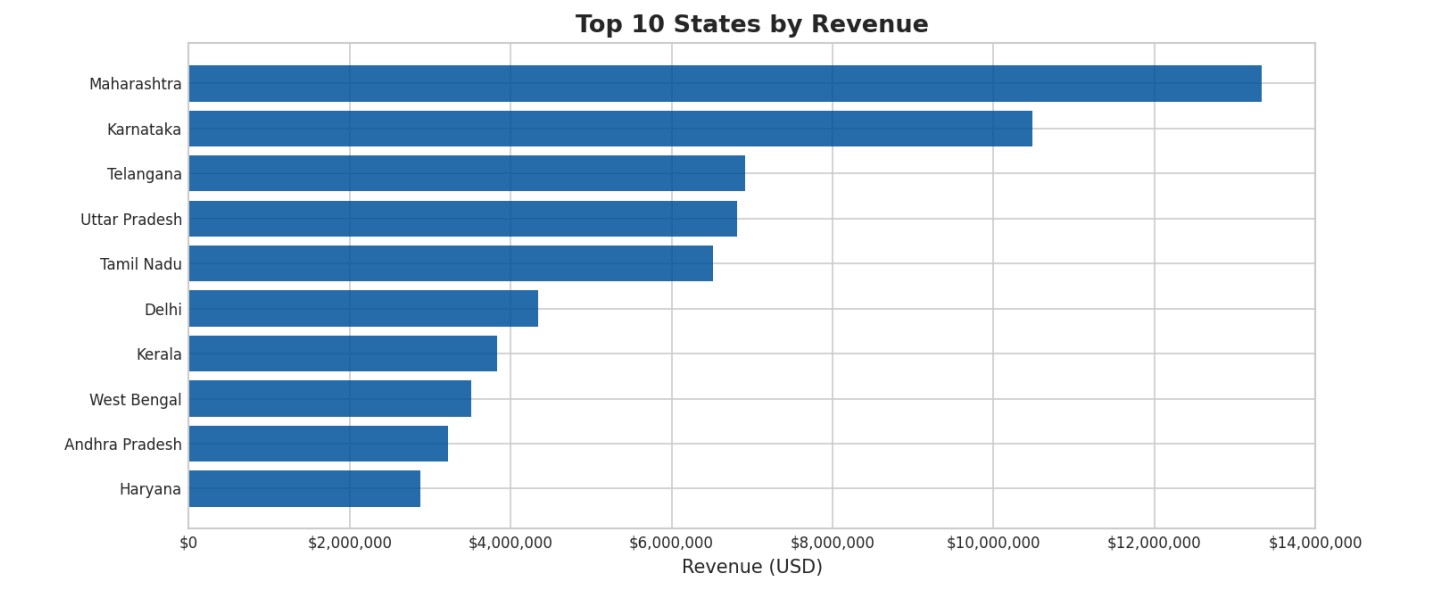

Figure 3 - Top 10 States by Revenue (USD)

Top 10 Products by Revenue

The highest revenue SKUs ranked by units sold, revenue, and average unit price.

Product / SKU	Revenue (USD)	Units Sold	Avg Price (USD)
J0230-SKD-M	\$527,699	468	\$1,128
JNE3797-KR-L	\$524,582	661	\$794
J0230-SKD-S	\$479,937	421	\$1,140
JNE3797-KR-M	\$454,290	561	\$810
JNE3797-KR-S	\$407,303	503	\$810
JNE3797-KR-XL	\$332,155	415	\$800
J0230-SKD-L	\$305,617	272	\$1,124
JNE3797-KR-XS	\$303,617	386	\$787
SET268-KR-NP-XL	\$284,059	373	\$762
JNE3797-KR-XXXL	\$276,376	353	\$783
